

Rice Terraces Of The Philippine Cordilleras

Carved into the mountains over two thousand years ago, the Rice Terraces of the Philippine Cordilleras reveal a profound dialogue between people and landscape. These living terraces sustain communities and agricultural knowledge. Through UNESCO recognition, conservation programs and local stewardship have helped preserve this fragile cultural landscape for future generations.

The World That Sustains Us

Lines And Geoglyphs Of Nazca And Palpa

Etched across the desert nearly two millennia ago, the Lines and Geoglyphs of Nazca and Palpa form immense drawings visible only from the sky. They reflect ancient knowledge, ritual, and communication with the cosmos. Through UNESCO protection, research, monitoring, and preservation efforts safeguard these fragile markings against erosion and human disturbance.

Whistled Language Of La Gomera (Silbo Gomero)

Across the deep valleys of La Gomera, voices transform into the wind. The whistled language Silbo Gomero carries messages across cliffs and ravines, turning breath into actual communication shaped by landscape. Through UNESCO recognition and education, this remarkable language continues to echo through the mountains, keeping an ancient dialogue between the people and the land they call home, alive.

Remembers Us

Al-Sadu Weaving Tradition

Across the deserts of Arabian Peninsula, threads become the maps of memory. The Al-Sadu Weaving Tradition transforms wool into geometric patterns that tell ancient stories of nomadic life, land, and true identity. Through UNESCO safeguarding and cultural transmission, this woven tradition continues to unite multiple generations together across a forever changing desert landscape.

Moves Within Us

Samarra Archaeological City

Within the land of the Samarra Archaeological City rises the sweeping spiral of the Great Mosque's Malwiya minaret, a bold expression of the imagination and ambition of the Abbasid Caliphate. Once a vast imperial capital, Samarra reveals how architecture can shape an entire city and culture. Through UNESCO's protection, research, and global collaboration the city continues to be preserved its fragile ruins, preserving a vital monumental chapter of Islamic civilization for the world to not only study, but to remember, and develop from.

The World Built Through Us

Confraternity Of Flowers And Palms

This community-based ritual tradition practiced during seasonal religious festivities in El Salvador, invites participants to craft elaborate palm and floral decorations carried in processions. The practice blends Indigenous and Catholic influences, reinforcing social cohesion, intergenerational knowledge, and spiritual identity. Through collective making and celebration, the confraternity sustains cultural continuity while expressing devotion, landscape knowledge, and communal belonging.
